Resodyn Corporation welcomes new Director of Polymer Business and Product Development

Butte, MT April 16, 2010: Resodyn Corporation is proud to welcome Kevin M. Lane as its Director of Polymer Business and Product Development.

Mr. Lane brings integrity, energy, and executive experience in aerospace and technology with a track record of orchestrating profitable growth through new product development and global market expansion. Formerly he was the President and General Manager of *Special Processes of Arizona*, a *Triumph Group Company*.

The Materials Development group at Resodyn Corporation offers a wide range of technical solutions from its patented PTS gun for application of thermo-plastic coatings, to a suite of specially engineered polymers ranging from corrosion resistance and blast mitigation solutions to acoustic and syntactic foams.

Originally founded in 1994, Resodyn Corporation is an innovative technology development and manufacturing firm located in Butte, Montana that concentrates on the invention, advancement, and commercialization of technologies and products in their core areas of Resonant Acoustics, Materials Development, Advanced Instrumentation, and Biotechnology.
